

# Copyright Guidelines for Video Presentations

## Mesa College LRC Audio Visual Services

### “Fair Use” of Videos for In-Classroom Use

The following guidelines must be met in order to “publicly perform” (show) a video in class:

- Must be shown by the instructor, a guest lecturer, or a student;
- Must be done in the context of face-to-face teaching;
- Must involve the entire audience;
- Must take place at a nonprofit educational institution;
- Must be presented in the classroom (or similar place where instruction is conducted);
- Must be a lawfully made video (either commercially purchased or lawfully recorded – see below);
- Students who miss the viewing of the video in class may view it *privately* in the library.

### Use of Videos by Individuals

- Individuals or small groups (no more than 3) may *privately* view a video in the library. Private rooms are provided expressly for this purpose in the AV Department.

### Recording of Copyrighted Materials

Faculty may request that we do an off-air recording of a video program for use in their classroom teaching. The following guidelines apply:

- The program must be accessed through “broadcast” programming (this *excludes* pay per view channels and commercial satellite sources);
- The program must be erased 45 days after the recording date;
- The program must be used in the classroom within 10 days of the recording date;
- The program may be shown once to each of the instructor’s classes, and may be shown one more time if it is needed for clarification or reinforcement;
- The program may be used for the remaining 35 days for review and clarification by the instructor.
- When showing the video, the instructor must comply with the fair use restrictions listed above.

It is a violation of copyright to make duplicates of commercially produced and purchased videos. It is a violation of copyright to duplicate recordings that a teacher has made from broadcast programming.
